

Mikes testimonial

Little history first..

I've had my MR2 (Rev 2, Mk2, 3vz-fe track day car) for about 5 years now and have used "other well known companies" to get work carried out. I turned to Woodsport as I wasn't 100% satisfied with previous work carried out and through these forums Paul (and company) appeared to be honest and very knowledgeable plus priced at a fair price.

I've been dealing with Woodsport / Paul over the course of the past 2 years as we've tried to find a 2gr-fe in the UK at a sensible price (highest quote was £8000.00 + VAT if anyone is interested..) Didn't have much success at finding one at a sensible price and so the plan to 2gr-fe it was abandoned and I commissioned Woodsport to complete the following works for my track car.

Install LSD

Y-pipe mod

Port n Polish of the 3vz-fe

Lightened Fidanza flywheel.

RPS Clutch (it's a track day car - old one was knackered)

In ALL of my dealings with Woodsport over the past 2 years I can honestly say I have had nothing but good advice and quick replies to my emails / phone calls. It wasn't unusual for me to email Paul and have a reply back the same day.

I sent my car up to Paul about a month ago via a car transportation company and then drove the 604 mile round trip with a friend yesterday to collect her.

I can honestly say that the work has been carried out to an exceptional standard. Woodsport going so far as rectify a few things which also needed doing, but at no additional cost.

Outstanding service!

It's pretty obvious that Woodsport are very busy and yet I didn't feel as though it was a case of "hi,.. here is your car.. thanks bye!".

Paul took the time to give us a tour, we got a ride in the Rav6 (hilariously good fun :D) and saw/heard the Mk1 V8. Video doesn't do the Mk1 justice.. it has to be heard to be appreciated.

We got to look at other cars Woodsport were working on and the attention to detail was superb. I guess it should come as no surprise that Woodsport get a full 10/10 from me.

THANK YOU VERY MUCH Woodsport / Paul!!! Very rare for me to find a company that I can unreservedly recommend.
